SOFTWARE INTERFACE

The Touch Panel software on the **MK-7** fully integrates with your retail order management system for superior communications between ordering and the warehouse floor enabling your operation to guarantee accuracy and efficiency.

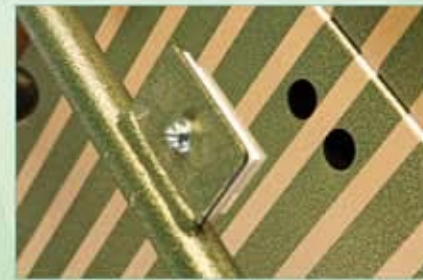

PNEUMATIC SYSTEM

The pneumatic-assisted cut piece removal arm enables the operator to dump cut pieces to the floor allowing for safe and quick operation. As well, the high speed pneumatic cutter is guaranteed to slice through nearly any type of flooring material in it's path.

ANTI-CONE CONTROL

Our automated anti-cone controls are just another benefit to this feature packed model. Photo sensors track the edge of the material automatically adjusting the machine to ensure for a straight, tight roll each and every time.

TOUCH PANEL CONTROLS

High volume operations appreciate the benefit of the Touch Panel Controls. With it's advanced software interface, the operator can program multiple presets and perform numerous cuts with total accuracy & efficiency, while inspecting the material as it rolls across the machine. This innovative feature allows for complete control right at your fingertips.
