## SOFTWARE INTERFACE

The Touch Panel software on the **MK-10** fully integrates with your retail order management system for superior communications between ordering and the warehouse floor enabling your operation to guarantee accuracy and efficiency.

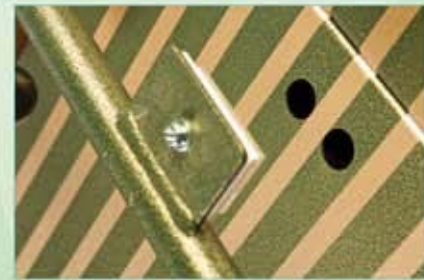

## PNEUMATIC SYSTEM

The pneumatic-assisted cut piece removal arm & piston allow the operator to dump cut pieces to the floor with ease ensuring for safe and quick operation. As well, the high speed pneumatic cutter is guaranteed to slice through nearly any type of flooring material in it's path.

## ANTI-CONE CONTROL

Our automated anti cone controls are just another benefit to this feature packed model. Photo sensors track the edge of the material automatically adjusting the machine to ensure for a straight, tight roll each and every time.

## TOUCH PANEL CONTROLS

High volume operations appreciate the benefit the Color Touch Panel. With it's advanced software interface, this enables the operator to program multiple presets and perform numerous cuts with total accuracy & efficiency while inspecting the material as it rolls across the machine. This innovation allows for complete control right at your fingertips.

## MK-10 SPECIFICATIONS

QUALITY, AFFORDABLE, INNOVATIVE
