## SOFTWARE INTERFACE

The PLC software on the **MK-6** fully integrates with your retail order management system for superior communications between ordering and the warehouse floor enabling your operation to guarantee accuracy and efficiency.

## PNEUMATIC SYSTEM

With the push of a button, the **MK-6's** pneumatic anti-cone shuttle system allows the operator to adjust the position of the roll during setup and helps ensure a tight, straight roll up by eliminating coning.

## DURABLE

Our low maintenance and easily serviced design let you enjoy the benefits of this machine for many years of dependable operation.

## PROGRAMMABLE CONTROLS

High volume operations requiring multiple cuts appreciate the benefit of a PLC, a feature of the **MK-6**. The PLC, with its advanced software interface enable the operator to program multiple presets and perform numerous cuts with total accuracy & efficiency all while inspecting the material as it rolls across the machine.
